

## **COST REDUCTION PROGRAMS**

Metcast offers comprehensive programs to work with your staff to determine potential cost reduction opportunities to maximize the operation and cost effectiveness of your equipment.

### ***We've worked with various customers in the following areas:***

- Comprehensive Analysis of your Blast Machine Operation. We review the entire machine, pinpoint areas for potential cost savings and improvement. Examples include: Cycle Times, Abrasive Consumption, Work Flow and much more.
- Complete Analysis of the Work Handling System
- Complete Analysis of the Separation System
- Complete Analysis of the Dust Collection System. We can verify fan conditions, air volumes, air velocities, ductwork design and function.
- Consignment or targeted stock programs to better manage inventory
- Special Services are available on request
